<b>Summary</b>	<b>III</b>
<b>Acknowledgements</b>	<b>IX</b>
<b>Table of Contents</b>	<b>XI</b>
<b>List of Figures</b>	<b>XV</b>
<b>List of Tables</b>	<b>XVII</b>
<b>List of Abbreviations</b>	<b>XIX</b>
<b>1 Introduction</b>	<b>1</b>
1.1 Agricultural and environmental background	1
1.1.1 Agricultural development – Striving for self-sufficiency	1
1.1.2 Nitrogen fertilisation – A fundamental problem	2
1.1.3 Agri-environmental situation – A matter of urgency	3
1.1.4 General environmental awareness – A question of education	4
1.1.5 “The Three Rural Issues” – A future challenge	4
1.1.6 Farmers’ decision-making in the crossfire of influences	5
1.2 Research framework	7
1.3 Outline of the thesis	12

<b>2</b>	<b>Theoretical Framework</b>	<b>15</b>
2.1	Economic theory of individual behaviour	16
2.1.1	The economic model of individual decision-making	16
2.1.2	Modified approaches including cognitive and social motivations	18
2.1.3	Social embeddedness and the rationality of individual decision-making	19
2.2	Socio-psychological theory of human behaviour	20
2.2.1	Fundamentals of cognitive hierarchy models	20
2.2.2	Cognitive hierarchy model of human behaviour	21
2.3	Theoretical background of selected decision-making determinants	23
2.3.1	Fundamental value positions	23
2.3.2	<i>Guānxi</i> relationships – a socio-cultural dimension	28
2.3.3	Environmental attitudes in China	35
2.4	Comprehensive model of individual decision-making	36
<b>3</b>	<b>Empirical Research</b>	<b>39</b>
3.1	Study area	39
3.1.1	The North China Plain	39
3.1.2	Socio-economic situation of Shandong Province	41
3.1.3	Impact of agricultural regulations	44
3.1.4	Agriculture in the research area	44
3.1.5	The pilot counties Huimin and Shouguang	46
3.1.6	Fertilisation in the research area	49
3.2	Questionnaire design	50
3.2.1	Questionnaire composition	51
3.2.2	Description of variables	53
3.2.3	Question-forming and response-scaling techniques	57
3.2.4	Questionnaire adaption to the local situation	60
3.2.5	Research ethic	60
3.3	Sample selection	62
3.4	Survey data collection	65

3.4.1 Interviewer training	65
3.4.2 Questioning operation	67
3.4.3 Operation errors – Item nonresponse	68
3.4.4 Data entry	69
3.4.5 Data screening	70
<b>4 Data Analysis and Results</b>	<b>71</b>
4.1 Methods used for statistical data analysis	71
4.1.1 Descriptive analysis	72
4.1.2 Apparent Nitrogen Use Efficiency	73
4.1.3 Standard Gross Margin calculations	75
4.1.4 Factor Analysis of agri-environmental attitudes and <i>guānxi</i> -traits	77
4.1.5 Similarity Structure Analysis with fundamental value items	79
4.1.6 Correlations with the value cycle	81
4.1.7 Structural equation modelling of economic, social and cognitive variables	82
4.2 Household and farm characteristics	84
4.3 Agronomic status quo of wheat and maize production	86
4.3.1 Achieved yields of wheat and maize production and nitrogen demands	86
4.3.2 Fertilisation management – practice, knowledge and decision making	88
4.3.3 Dimensions of nitrogen overuse	92
4.3.4 Potential to increase the apparent Nitrogen Use Efficiency	95
4.4 Profitability of the cropping system	96
4.4.1 Standard Gross Margins of winter wheat and summer maize	96
4.4.2 Production costs of wheat and maize production	98
4.4.3 Family labour input	101
4.4.4 Profitability development while assessing opportunity costs for labour	102
4.5 Characteristics of the decision-makers and their farm units	104
4.5.1 Respondent, household and farm characteristics	104
4.5.2 Agri-environmental knowledge	107
4.5.3 General attitudes towards environmental issues	109

4.5.4 Perception of water pollution and the monetary value of water quality	113
4.5.5 Farmers' fundamental value orientation	115
4.5.6 Traits of farmers' <i>guānxi</i> relationships	120
4.5.7 Correlations between fundamental value orientations and <i>guānxi</i> traits	122
4.5.8 Correlations between fundamental value orientations and environmental attitudes	124
4.6 Impact of cognitive and social factors on farmers' decision-making	127
4.6.1 Evaluation and description of the PLS model	127
4.6.2 Factors influencing farmers' agri-environmental attitudes	131
4.6.3 Decision determinants of farmers' fertilisation behaviour	133
4.6.4 Motivation for farmers' WTP for environmental goods	135
4.6.5 Relevance of cognitive and social decision-making determinants for better adapted agricultural training approaches	136
<b>5 Conclusion</b>	<b>139</b>
5.1 Discussion of results	139
5.2 Strengths and limitations	152
5.3 Outlook – Policy implications	154
