Foreword On what criteria build, and develop, an academic career, and one's reputation, and how this book was conceived	11
The quest for academic quality and the Scopus fetish.....	13
How much is too much?	
What this book is about and about a life-career balance	16
How to read, and use, this book.....	18
Acknowledgements	21
Writing, creating, procrastinating, submitting.....	25
The greatest open secret of academia:	
on the fundamental role of abstracts.....	25
Why are my abstracts regularly turned down?.....	27
The perfect abstract I: addressing.....	29
The perfect abstract II: sending (and receiving) a message	30
The perfect abstract III:	
what you want to see in the abstract? (we finally got there)	32
The perfect abstract IV: 300 words that will change your life.....	33
Why papers get rejected, or not, by journals.....	35
The wicked art of framing your research.....	38
How the same data evidence can be adapted to different contexts to approach different journals. And why it will be rejected if you go to the wrong journal	41
Methodological choices, and dilemmas.....	45
How much is too much? On overpopulated bibliographies	46
The wicked "I" in an article.....	47

Publishing, negotiating, advertising, consolidating.....	49
How to get in a good publication?	49
How to get your article accepted? (some strategic considerations on the peer review process)	52
What are the possible outcomes of a peer review process and what is their hidden message?	54
Why not to publish in a special (guest-edited) issue of a journal?	56
Why to publish in a special (guest-edited) issue of a journal?.....	57
How to get invited to deliver a guest lecture?	62
Why should I organize a panel at a conference?	63
Should I use PowerPoint for my presentation?	65
Why should I try and popularize science? (on targeting the general public)	66
And if I still do not feel like popularize science?.....	68
Why to bother with social media accounts and posting?.....	70
Why should I try to deliver a 60-second lecture?.....	71
Growing: ascending, expanding, multiplying.....	75
Is it “good” or “bad” to have co-authors?.....	75
How many co-authors should I take?.....	77
A journal article vs a book chapter	78
Why to write, or at least, publish a book chapter?	80
A book chapter as training	81
Why to edit a book?.....	82
Why to edit a special issue of a journal?	84
Why to publish with an academic press?	85
What can I expect from a commercial publisher?	88
Why to publish a book that sells at €150 per copy?	90
I have sent a book proposal to a publisher. Why did I not get any feedback?.....	91

How to maximize the chances that you will get a (hopefully positive) reply from a publisher?.....	94
What are the entry points to approach a publisher?	95
How to increase the chances that your proposal will be ignored?	96
Fast and famous: publisher’s vs author’s reputation	98
Journal ranking and other academic obsessions (slow and fast journals).....	99
Why a journal may rank in different quartiles for different disciplines in Scopus	104
How to distinguish a ‘good’ conference from a ‘bad’ conference?	105
Being an assessor, evaluator or reviewer is time-consuming: why to bother?	107
Shining: Stand out, getting visible, fame in academia	111
How can I know if I am considered a good scholar?	111
How democratic should policy decisions be on science?	113
What I need to do vs. what I want to do: is there a balance for an academic career?	115
Frustrations and survival.....	118
The risks of metrics	121
How to publish in a Scopus journal?	126
How do you enter Scopus (Web of Science or any other journal’s hall of fame)?	130
Why should I establish a journal in a language other than English? ...	134
How to start an academic journal?	135
The advantages, and traps, of publishing open access.....	139
How to make your work available to everyone even if access is restricted?.....	142
In which database should I try and stand out?.....	146

Shining II: Getting even more famous.....	149
How to choose the literature to use for an article?.....	149
How to locate your paper in current debates (theoretical vs empirical paper)	153
Fully theoretical article	154
Empirical article	155
Somewhere mid-way between empirical and theoretical (area studies).....	155
Why (not) to publish with Cambridge University Press?.....	155
Plus and minuses of working with someone very famous	157
Arrange guest lectures.....	159
Attend conferences and international events	160
Media engagement and popular science books.....	161
“Niching”, balancing, positioning	165
PhD: one name, many meanings	165
How can you claim credit (and what credit) for your publications?....	168
Research, teaching, administration, fundraising: carving your way into stability.....	172
Is it better to publish a book or a journal?	175
Applied vs. fundamental research.....	177
Is it worth paying publication fees?	
On the boundary between predatory and non-predatory journals ..	180
Open access vs commercial publishers	182
The monopoly of prestige: more on commercial publishers	184
Networking, talking, traveling, moving around.....	187
Why should I attend a workshop instead of a conference, or a congress?	187
How to choose the perfect event for you at a given stage in your career?.....	188

Academic and professional associations: who needs membership?	189
Why organize a panel at a major conference?	194
Other advantages of contributing to a panel, or an event	195
Paper presenter, chair or discussant	197
Publishing your work presented at a conference: is it worth it?	200
Presentation skills.....	202
Funding, spending, earning and other money issues.....	205
What makes a good fundraiser (in academia as elsewhere)?.....	205
Why are some grants harder than others to get?.....	206
What grants are easier to get? Tip 1: look at the overheads	207
What grants are easier to get? Tip 2: look at PI compensation packages.....	209
So what criteria does one use when applying for grants? (seen like a donor).....	211
They say there is no money in academia, is it really so?	213
So who are the gatekeepers of money (and power) in academia (and around academia)?.....	214
What if you have no money to go to a conference?	216
What if I live faraway or in an isolated country and cannot travel?..	217
What if there is nothing in my country and I need to present at an international event?	218
What is a deadline and what is an academic deadline?	220
Conclusion: on the challenges of designing academic strategies ...	223
