FOREWORD	V
ACKNOWLEDGEMENTS	VII
FIGURES	XV
TABLES	XXI
VARIABLES AND SYMBOLS	XXIII
ABBREVIATIONS	XXXI
1 INTRODUCTION	1
1.1 Motivation and Research Questions.....	1
1.2 Methodology	3
1.3 Structure of the Thesis.....	4
2 INFORMATION LOGISTICS	9
2.1 Business Management View on Information Logistics.....	9
2.1.1 Information Management and Information Logistics	10
2.1.2 Information as the Information Logistics Subject of Consideration	12
2.1.3 Information Logistics in Information Exchange Networks.....	15
2.2 Information Logistics Tasks.....	16
2.2.1 Information Logistics Infrastructure	17
2.2.1.1 Storage-Oriented IC Technologies.....	17
2.2.1.2 Transshipment-Oriented IC Technologies	18
2.2.1.3 Transport-Oriented IC Technologies	20
2.2.1.4 Network Infrastructure.....	22
2.2.1.4.1 Network Topologies.....	22
2.2.1.4.2 Examples of Network Infrastructure	24
2.2.2 Transport of Information.....	25
2.2.2.1 Routing.....	26
2.2.2.1.1 Metric-Dependent Routing.....	26

2.2.2.1.2	Centralized versus Decentralized Routing	28
2.2.2.1.3	Complete Information- versus Local Information-Based Routing	28
2.2.2.1.4	Static versus Dynamic Routing	29
2.2.2.1.5	Unicast, Multicast, and Broadcast Routing	30
2.2.2.1.6	Flat versus Hierarchical Routing.....	31
2.2.2.1.7	Network Type-Dependent Routing	32
2.2.2.1.8	Connection-Oriented versus Connectionless Routing	33
2.2.2.1.9	Flow Model-Based Routing	34
2.2.2.2	Flow Control	35
2.2.2.2.1	Objectives.....	36
2.2.2.2.2	Means of Flow Control	38
2.2.2.2.3	Levels of Flow Control	40
2.2.2.2.4	Flow Control Strategies.....	41
2.2.2.2.5	Network Information Theory	42
3	INFORMATION ALLOCATION	45
3.1	Taxonomy for Classifying Information Allocation Approaches	45
3.1.1	Objectives	46
3.1.2	Information Allocation Problems.....	47
3.1.2.1	File Replication Problem	49
3.1.2.2	File Migration Problem.....	49
3.1.2.3	File Allocation Problem	49
3.1.2.4	Distributed Paging Problem	50
3.1.2.5	Overview.....	51
3.1.3	Static versus Dynamic Information Allocation.....	51
3.1.4	On-line versus Off-line Algorithms	52
3.1.5	Centralized versus Distributed Algorithms	55
3.2	Survey of Information Allocation Approaches.....	56
3.2.1	Algorithms for Static Information Allocation.....	56
3.2.2	Algorithms for Dynamic Information Allocation	60
3.2.2.1	Off-line Algorithms	60
3.2.2.2	On-line Algorithms	61
3.2.2.2.1	File Migration Algorithms	62
3.2.2.2.2	File Replication Algorithms	64
3.2.2.2.3	File Allocation Algorithms.....	66
3.2.2.2.4	Distributed Paging Algorithms.....	70
3.3	Quality of Service.....	73
3.3.1	Information Quality Objective and Its Relation to Other Information Allocation Objectives	74
3.3.2	Need-to-Know Principle	77
3.3.3	Applications Demanding Different Levels of Information Currency	78
3.3.4	Taxonomy for Classifying Update Mechanisms.....	82

3.3.4.1	Minimum Synchronous Updates.....	82
3.3.4.2	Responsibility for Update Transfer.....	84
3.3.4.3	Update Consistency Requirements	85
3.3.5	Survey and Classification of Weak Consistency Update Mechanisms	87
3.3.5.1	Unbounded Inconsistency Approaches.....	87
3.3.5.2	Bounded Inconsistency Approaches	89
3.3.5.2.1	Data-Oriented Approaches.....	89
3.3.5.2.2	Operational Approaches.....	92
3.3.5.3	Summary of Weak Consistency Approaches.....	96
4	AGENT-BASED SYSTEMS.....	99
4.1	Software Agents	99
4.1.1	Definition.....	99
4.1.2	Software Agents and Objects.....	102
4.1.3	Software Agent Typology.....	103
4.1.3.1	Software Agent Taxonomies and Classifications in Literature.....	104
4.1.3.2	Important Software Agent Types.....	105
4.1.4	Software Agent Architectures.....	112
4.1.4.1	Deliberative, Logic-Based Software Agent Architectures.....	112
4.1.4.2	Reactive Software Agent Architectures.....	114
4.1.4.3	Hybrid Layered Software Agent Architectures.....	116
4.1.4.4	Belief-Desire-Intention Software Agent Architectures.....	117
4.2	Multi-Agent Systems.....	120
4.2.1	Distributed Artificial Intelligence and Multi-Agent Systems	120
4.2.2	Advantages of Multi-Agent Systems	123
4.2.3	Multi-Agent Interaction	127
4.2.3.1	Interaction / Communication Language.....	127
4.2.3.2	Interaction Mechanisms	130
4.2.3.2.1	Organizational Structuring.....	131
4.2.3.2.2	Contracting.....	132
4.2.3.2.3	Multi-Agent Planning.....	134
4.2.3.2.4	Social Laws	136
4.2.3.2.5	Joint Intentions.....	138
4.2.3.2.6	Negotiation.....	139
4.2.3.2.7	Market-Based Approaches	145
4.2.3.2.7.1	Resource-Directed Approaches.....	146
4.2.3.2.7.2	Price-Directed Approaches.....	147
4.2.3.2.8	Further Approaches.....	155
5	INFORMATION LOGISTICS IN SUPPLY WEBS	157
5.1	Efficient Supply Web Planning Based on Optimal Information Exchange.....	157

5.2	Transportation Planning Based on Different Information Needs	164
5.2.1	Coordination of Transportation Services	164
5.2.2	Vehicle Routing Based on Different Information Currencies.....	166
5.2.3	Determination of the Demanded Degree of Information Currency.....	170
5.3	Information Logistics among Electronic Transportation Services Marketplaces.....	178
6	CENTRALIZED INFORMATION ALLOCATION MODELS	181
6.1	Basic Optimization Model.....	182
6.2	Numerical Example	187
6.3	Weak Consistency versus Strong Consistency Solution	190
6.4	Realistic Update Mechanism.....	193
6.5	Update Mechanism Based on Average Information Ages	199
6.6	Comparison of Centralized Information Allocation Models.....	202
7	DECENTRALIZED INFORMATION ALLOCATION ALGORITHMS	207
7.1	Definition and Advantages of Decentralized Algorithms	208
7.2	Economic-Based Approaches.....	211
7.2.1	Benefits of Economic-Based Approaches.....	211
7.2.2	State-of-the-Art Approaches	214
7.2.2.1	Game Theory-Based Negotiation Algorithm	214
7.2.2.2	Market-Based Algorithms.....	215
7.3	Simulated Annealing-Based Approaches.....	221
7.3.1	Fundamentals of Simulated Annealing	221
7.3.2	Distributed Simulated Annealing.....	223
7.4	Static Information Allocation Algorithms	225
7.4.1	Simulated Annealing-Based Algorithms for Static Information Allocation	226
7.4.1.1	Basic Structure of the Algorithms.....	227
7.4.1.2	Neighbor Selection Method	228
7.4.1.3	Costs Calculation	230
7.4.1.4	Naïve Update Mechanism.....	232
7.4.1.5	Update Mechanism Based on Average Information Ages	239
7.4.1.6	Update Mechanism Based on Actual Update Frequencies.....	245
7.4.2	Economic-based Algorithm for Static Information Allocation	256
7.4.3	Comparison of the Decentralized Static Information Allocation Algorithms	260

7.5	Dynamic Information Allocation Algorithms.....	263
7.5.1	Simulated Annealing-Based Algorithms for Dynamic Information Allocation.....	265
7.5.1.1	Dynamic Reheat Algorithm.....	265
7.5.1.2	Dynamic Cool Algorithm.....	274
7.5.2	Economic-Based Algorithm for Dynamic Information Allocation.....	279
7.5.3	Comparison of Decentralized Dynamic Information Allocation Algorithms.....	282
8	CONCLUSIONS AND FURTHER RESEARCH.....	293
8.1	Summary of the Findings.....	293
8.2	Further Research.....	301
	REFERENCES.....	307
