

Contents

VOLUME ONE

Preface

PART ONE : KEYNOTE LECTURES

- Recent developments in composite structures** 27
U. Kuhlmann
- Recent developments and open problems in fastening technique** 43
R. Eligehausen, W. Fuchs

PART TWO : CODE AND PRACTICE

- The human factor in fastening technology - a force to be reckoned with** 65
W. Fuchs
- Requirements of technical approvals versus practice (bonded anchors and post-installed rebars)** 75
G. Genesio, G. Periškić, K. Schmid, J. Appl, R. Eligehausen
- The "Certified Fastening Technician" as an example of advanced training for users** 85
G. Bauer, J. Küenzlen
- European technical approval (ETA) for anchorages** 93
G. Feistel
- Practical fastening design – a decade of the ETAG Annex C** 103
J. Varga
- History of anchoring steel to concrete in North America, 1900-1977** 113
P. Carrato, N. Carrato
- Historical perspective of anchorage to concrete standards and codes in the USA** 123
R.E. Wollmershauser

| | |
|---|------------|
| Qualification and design provisions for bonded anchors in the U.S. J.F. Silva | 131 |
| International building code compliant anchor approvals C. Fogstad, N. Randl | 141 |
| Anchor embedment requirements for signal/ sign structures K.M. Halcovage, R.A. Cook, M.H. Ansley | 151 |
| Investigation of effects of steel reinforcement ratios on testing and qualification of post-installed mechanical anchors in concrete J. Olsen, M. Ziegler | 161 |
| Testing conditions for prequalification of anchors for seismic applications M.S. Hoehler | 177 |
| Fastenings under tension load in lightweight and normal weight concrete A. Wildermuth, W. Fuchs, R. Eligehausen | 189 |
| European approval for fischer FZP undercut anchor in natural stone panels D. Lehmann, R. Unterweger | 201 |

PART THREE : CAST-IN ANCHORS

| | |
|---|------------|
| Tension tests on cast-in-place wire-formed inserts E. Baran, A.E. Schultz, C.E. French | 213 |
| Strut-and-tie model for anchorage of multiple headed bars S. Chun, S. Hong, B. Oh, D. Lee | 227 |
| Structural performance of deep anchor bolts in damaged foundations S. Bae, O. Bayrak, J.O. Jirsa, R.E. Klingner | 237 |
| Calculation of anchor channels under dynamic load on basis of the calculation for dowel fixings M. Heudorfer, F.W. Neikes | 247 |

| | |
|--|------------|
| Impact performance of retrofit highway barriers with mechanical anchors | 257 |
| G. Mitchell, M. Tolnai, V. Gokani, R. Picón, S. Yang, R.E. Klingner, E.B. Williamson | |

| | |
|--|------------|
| Model to analyse fastenings with shear lugs | 267 |
| H. Michler | |

PART FOUR : EXPANSION ANCHORS

| | |
|---|------------|
| Behaviour of expansion anchors to concrete | 279 |
| M. Karmazínová, J. Melcher | |

| | |
|---|------------|
| Comparison of load carrying capacities of selected types of post-installed anchors to concrete | 291 |
| M. Bajer, M. Karmazínová, J. Barnat | |

| | |
|---|------------|
| Expansion anchors in high performance concrete | 297 |
| S. Cattaneo, G. Muciaccia, G. Rosati | |

| | |
|---|------------|
| Experimental study of metal expansion anchor combined with resin | 307 |
| K. Imai, M. Inuma, K. Yamamoto, Y. Hosokawa | |

| | |
|--|------------|
| Study on the structural performance of post-installed anchors embedded in super-high strength concrete (150MPa) | 317 |
| K. Nakano, T. Sugiyama, Y. Matsuzaki | |

| | |
|---|------------|
| Behaviour of expansion and bonded anchors subjected to elevated temperatures | 329 |
| É. Lublóy, G. L. Balázs | |

PART FIVE : BONDED ANCHORS

| | |
|---|------------|
| Load bearing behaviour of bonded expansion anchors | 341 |
| T. Pregartner, J. Asmus | |

| | |
|---|------------|
| Influence of embedment depth and edges on tensile resistance of post-installed bonded anchor | 353 |
| T. Sugiyama, Y. Matsuzaki, K. Nakano | |

| | |
|--|------------|
| Design of bonded fasteners for splitting failure mode | 363 |
| T. Hüer, R. Eligehausen | |
| Pullout performance of retrofit adhesive anchors in low strength concrete | 373 |
| T. Gurbuz, Y. Kaya, A. Ilki, N. Kumbasar | |
| Bonded anchors under tensile load in high performance concrete | 383 |
| S. Cattaneo, G. Muciaccia | |

PART SIX : POST-INSTALLED REBARS

| | |
|---|------------|
| Post-installed rebars and tension rebar anchor – installation training, certification and design | 395 |
| M. Reuter, E. Schöffendt | |
| Behaviour and design of post-installed rebars under cyclic loading | 405 |
| I. Simons, R. Eligehausen | |
| Investigations to load-bearing capacity of bonded anchors and post-installed rebar connections | 415 |
| F. Zhu, L. Li | |
| Chemical bonding of concrete and steel reinforcement using a vitreous enamel coupling layer | 425 |
| L. Lynch, C. Weiss, D. Day, J. Tom, P. Malone, C. Hackler, M. Koenigstein | |

PART SEVEN : SPECIAL ANCHORS

| | |
|---|------------|
| Load bearing behavior of climbing cones with large load bearing area | 441 |
| J. Asmus, J. Schneider, R. Eligehausen, M. Gartner | |
| Behaviour of fasteners with an embedment depth of smaller than 25 mm | 453 |
| J. Hofmann, A. Kaupp | |

Load-bearing behaviour of screw anchors in cracked and non-cracked concrete 461

J. Küenzlen

Behavior of plastic anchors in uncracked and cracked concrete under tension loading 471

T. Pregartner

PART EIGHT : DESIGN

Design of connections between steel and concrete to eurocodes 483

J.W.B. Stark

Performance evaluation of single and group embedded chemical fastenings in concrete under tension load based on experimental measurements 495

O. Esmaili, S. Epackachi, M. Ghalibafian, R. Mirghaderi, A.A.T. Behbahani

Design method for splitting failure mode of fastenings 505

J. Asmus

Performance evaluation of single and group embedded chemical fastenings in concrete under shear load based on experimental measurements 519

S. Epackachi, O. Esmaili, M. Ghalibafian, R. Mirghaderi, A.A.T. Behbahani

Re-evaluation of pryout breakout capacity design provisions for headed studs and post-installed anchors loaded in shear 529

N.S. Anderson, D.F. Meinheit

Behaviour and design of anchorages in concrete close to the edge 539

R. Mihala, K. Bergmeister, A. Unterweger

Design of anchors close to an edge under shear loads 549

R. Mallée, P. Pusill-Wachsmuth

| | |
|---|------------|
| Side edge concrete breakout capacity of headed studs loaded in shear | 559 |
| N.S. Anderson, D.F. Meinheit | |
| Design of shear load connectors with supplementary reinforcement | 569 |
| J. Asmus, J. Schneider, R. Eligehausen, U. Oelhafen | |
| Influence of anchor reinforcement on behaviour of anchorages under shear load | 583 |
| K. Schmid, R. Eligehausen | |
| Behaviour of anchors in a corner of a column under tension and shear loads | 597 |
| R. Mollé | |
| Permutations of the combined tension and shear (N-V) interaction for headed studs | 607 |
| A.K. Tureyen, N.S. Anderson, D.F. Meinheit | |
| Calculation of anchor loads in multiple-anchor fastenings subjected to combined bending moments and tension load | 617 |
| L. Li, H. Quan | |
| Influence of a torque moment or an eccentric shear load on the behaviour of double or triple fastenings parallel to the edge | 625 |
| J. Hofmann | |
| Quadruple fastenings under torsion loading | 639 |
| P. Grosser, W. Fuchs, R. Eligehausen | |
| Experimental evaluation of the influence of reinforcement on the tensile resistance of headed steel anchors embedded in concrete | 655 |
| J.M. Raposo, L.C. Neves, L.S. da Silva | |

PART NINE : SEISMIC

| | |
|--|------------|
| Seismic design provisions for anchors in the U.S. | 667 |
| J.F. Silva, M.S. Hoehler | |

| | |
|--|------------|
| A new seismic test for metal anchors | 677 |
| T. Guillet, E. David | |
| Experimental and numerical investigation of the seismic behaviour of concrete anchors | 687 |
| A. Rieder, K. Bergmeister | |
| Behavior of fastenings under realistic earthquake excitations | 693 |
| T. Sippel, A. Rieder | |
| Seismic performance and modelling of post-tensioned precast concrete beam to column connections with supplementary energy dissipation | 703 |
| H.A. Spieth, A. Carr, S. Pampanin, J. Mander | |

VOLUME TWO

| | |
|--|------------|
| Full-scale shake table test of pipes anchored in a 7-story RC building | 747 |
| M.S. Hoehler, J.F. Silva, L. Floriani, U. Bourgund, H. Gassner, J.I. Restrepo, M. Panagiotou | |
| Shear transfer mechanism to bonded anchors for exterior seismic retrofitting | 759 |
| Y. Hattori, Y. Yamamoto | |
| Seismic strengthening of school building damaged by 2004, Niigata-Chuetsu earthquake | 771 |
| T. Akiyama, Y. Yamamoto, K. Ariki, Y. Kado | |

PART TEN : EXPERIMENTAL STUDIES

| | |
|---|------------|
| Monitoring the steel-concrete interaction using acoustic emission techniques | 785 |
| C. Grosse, H.-W. Reinhardt | |
| High sophisticated full field interferometry (ESPI) on concentrate loaded concrete | 795 |
| A. Unterweger, K. Bergmeister, R. Mihala | |

| | |
|--|------------|
| The experimental investigation of connection between steel and reinforced concrete shear wall | 807 |
| M. Husem, S. Pul, E. Yozgat, S.E. Gorkem | |
| Load bearing behaviour of a heavy load undercut grouted anchor | 817 |
| T. Pregartner, R. Eligehausen, W. Fuchs | |
| A test and design concept for the fischer FZP-G undercut point fitting for glass panels | 827 |
| R. Unterweger, J. Beyer, J.-D. Wörner, R. Hilber, K. Bergmeister | |

PART ELEVEN : NUMERIC

| | |
|---|------------|
| Analyzing behaviour of bonded anchors by experimental and numerical approach | 839 |
| M. Bajer, J. Kala, J. Barnat | |
| A numerical simulation of bond for pull-out tests- the direct problem | 849 |
| S. Khalfallah, M. Ouchenane | |
| Numerical study on size effect and design recommendation for large chemical anchor | 861 |
| P. Liao, Y. Li, J. Kunz, B. Winkler | |
| Determination of point thermal transmittance of anchors by means of theory, numerical simulation and practical operation | 871 |
| F. Burkhardt, H.A. Spieth | |
| Numerical analysis of spalling of concrete cover at high temperature | 881 |
| J. Ozbolt, G. Periškić, H.-W. Reinhardt, R. Eligehausen | |

PART TWELVE : APPLICATION

| | |
|---|------------|
| Horizontal stiffening systems for buildings via column restraints and frames | 895 |
| K.-P. Geh, M. Kintscher | |

| | |
|--|------------|
| Horizontal stiffening systems of building by means of shear walls connected by wire rope loop systems | 903 |
| M. Kintscher | |
| GFRP-Rebars for permanent applications design procedure | 915 |
| H. Braasch, A. Weber | |
| Connections between iron and masonry, in the old buildings of izmir, turkey | 925 |
| Y.K. Aktuglu | |
| Fastenings for handrails and balustrades in narrow edge surfaces of slabs by use of special anchor channels | 929 |
| D. Lotze, J. Meszaros, C. Lutz | |
| Anchoring of window frames subjected to wind loads in typhoon regions | 941 |
| J. Buhler | |
| Fastener for subsequent sealing of basements with a waterproof TRC construction | 945 |
| P. Schillinger, R. Mott, M. Hinzen, W. Brameshuber | |
| Expansion and bonded anchors in expanded clay aggregate concrete | 955 |
| R. Nemes | |
| Durability and ultimate strength of external tendon anchorage for prestressed concrete girders | 963 |
| L. Huang, K. Komine, H. Hikosaka | |
| Shear connectors for innovative slab track construction | 973 |
| J. Kunz | |

PART THIRTEEN : PUNCHING

| | |
|--|------------|
| Punching shear reinforcement for semi-precast slabs | 985 |
| J. Furche | |
| Punching tests on corner slab column connections with shear reinforcement | 995 |
| A. Negele, R. Eligehausen | |

| | |
|---|-------------|
| Effectiveness of shear bolts in retrofitting slab-columns connections against punching | 1007 |
| M.A. Polak | |
| Continuous shear connectors in high performance concrete | 1017 |
| O. Hechler, M. Feldmann, S. Rauscher, J. Hegger | |
| Experimental investigations on punching behaviour of edge column-slab connections | 1027 |
| J. Hegger, M. Ricker, F. Häusler | |
| Earthquake response of composite steel and concrete base column connections | 1037 |
| L. Di Sarno, M. Pecce | |

PART FOURTEEN : CONNECTIONS

| | |
|---|-------------|
| Component method for anchor plates | 1049 |
| U. Kuhlmann, M. Rybinski | |
| Stiffness requirements for baseplates | 1059 |
| S. Fichtner, R.Eligehausen | |
| The structural assessment of rigid connections between reinforced concrete and steel members within framed buildings | 1073 |
| K. Micallef | |
| Improvement of load bearing capacity in design of anchor plates with headed studs in concrete columns | 1083 |
| S. Fromknecht, C. Odenbreit | |

PART FIFTEEN : HYBRID STRUCTURES

| | |
|--|-------------|
| Experiments and FE-model for a connection between steel frames and precast concrete infill panels | 1093 |
| P.A. Teeuwen, C.S. Kleinman, H.H. Snijder, H. Hofmeyer | |
| Static and fatigue behaviour of grouted connections for hybrid structures | 1103 |
| L. Lohaus, S. Anders | |

| | |
|--|-------------|
| The inelastic behaviors of connections of steel column and reinforced concrete base | 1113 |
| E. Yozgat, M. Husem, S. Pul, S. E. Gorkem | |

PART SIXTEEN : CONCRETE - STEEL - BOND

| | |
|--|-------------|
| Production of reinforcement mesh - welding technique, code requirements, quality assurance aspects | 1125 |
| M. Müller, M. Greitmann | |
| Proposal of a new experimental procedure to determinate the anchorage length of high strength steel wires | 1131 |
| M.A. Vicente, D.C. González | |
| Lightweight and ordinary concrete-steel bond strength | 1141 |
| S. Pul, M. Husem, S. E. Gorkem, E. Yozgat | |
| The influence of HSC concrete and steel interaction on the RC members ductility | 1151 |
| T. Waśniewski, Ł. Sowa, M.E. Kamińska | |
| Effect of embedment length on bond stress-slip response in high strength concrete | 1161 |
| G. A. Rao, K. Pandurangan, R. Eligehausen | |
| Concrete-steel bond characterization of RC structural elements built with smooth plain reinforcement bars | 1171 |
| C. Fernandes, H. Varum, A. Costa | |
| Connecting system between micro pile and precast concrete member with grout-filled sleeve | 1181 |
| Y. Inatomi, T. Yamane, I. Yoshitake, F. Miura | |
| Numerical modelling of the effect of corrosion on the behaviour of RC-beams reinforced with plain bar reinforcement | 1191 |
| T. Pregartner, J. Cairns | |

PART SEVENTEEN : COMPOSITE STRUCTURES

- Behavior of connections between open sandwich slab to double steel skin wall composite walls** 1203
W. Kim, S. Hong, W. Kim
- Failure mechanism analyze of bonded steel-concrete composite beams by finite element** 1213
A. Li, G. Zhao
- Connections by adherence for steel-concrete composite beams** 1223
J.-P. Lebet, M. Thomann
- Shear behaviour of grouped stud connectors in precast slab: Effects of filling material and recess arrangement** 1233
A. Lachal, J.-M. Aribert, L. Demilecamps

PART EIGHTEEN : COMPOSITE BEAMS AND FLOORS

- Innovative slab systems with slim-floor profiles** 1245
U. Kuhlmann, G. Hauf
- The effect of shear rails in concrete chords of composite girders at web openings** 1255
W. Ramm, C. Kohlmeyer, J. Schnell, C. Balzer
- Shear resistance of steel studs in composite steel beams with precast concrete hollow core floor slabs under biaxial loads** 1265
K.S. Elliott, K. A. Rashid
- Correlation between stiffness of composite connections and adjacent composite beams** 1275
C. Hahn, C. Odenbreit
- Experimental analyze of bonded steel concrete composite beams** 1283
A. Li, L. Bouazaoui, G. Perrenot, Y. Delmas

PART NINETEEN : CONNECTORS IN HIGH
PERFORMANCE CONCRETE

- Innovative shear connection for composite beams with UHPC** 1295
J. Hegger, S. Rauscher
- Property of shear connectors for steel and light-weight
concrete composite girder** 1305
M. Tsujikado, Y. Fujiwara, T. Hosaka, H. Hiragi

PART TWENTY : TEST METHODS

- Experimental study on new connection of mixed structure** 1317
Y. Tanaka, Y. Takahashi, T. Ueda
- Novel shear connectors
experimental investigations and numerical comparisons** 1327
J. Fink, T. Petraschek
- The experimental investigation of the effects of different types
and combinations of shear connectors in steel-concrete
composite beams** 1337
S.E. Görkem, M. Husem, S. Pul, E. Yozgat

PART TWENTY-ONE : FATIGUE

- Fatigue resistance of aperture plate shear connectors** 1349
M. Gündel, B. Hauke
- Fatigue behaviour of horizontally lying shear studs** 1359
U. Kuhlmann, J. Raichle
- Static and fatigue behaviors of shear studs damaged by fire** 1369
Y. Imagawa, O. Ohyama, A. Kurita

PART TWENTY-TWO : CONNECTORS

- New methods of connection for composite girders with
corrugated steel webs** 1381
B. Novák, J. Röhm, M. Weissbach

- Aperture plates as ductile shear connectors for high performance composite members** 1391
B. Hauke, M. Gündel
- Development of new hole shape of perfobond shear connectors, parametric study** 1401
S.Y.K. Al-Darzi, A.R. Chen, Y.Q. Liu
- Transverse reinforcing bars as shear connectors in shallow floor composite beams** 1415
M.V. Leskelä, J. Hopia
- Experimental analysis of headed studs connectors in hogging moment regions of steel and concrete composite members** 1425
G. Fabbrocino, M. Pecce, E. Cosenza
- Bigger is better: Development of the 31.8-mm diameter shear stud for steel bridges in USA** 1437
S.S. Badie, M.K. Tadros, A.F. Girgis, N. Nguyen
