

Table of contents

Word from the editors	V
Preface and Acknowledgement	VII
Table of contents	IX
LCA-IWM Project Partners	XIII
Contributions Listed by Project Partners	XVII
List of abbreviations	XIX
1 Introduction	1
1.1 General	1
1.2 Municipal waste definition.....	2
1.3 Waste composition	3
2 Waste Prognosis	7
2.1 Introduction	7
2.2 Prognosis of municipal solid waste generation	8
2.3 Separate collection performance	17
3 Assessment Tool	23
3.1 Scope of the assessment and functional unit	23
3.2 Data inventory and allocation procedures	25
4 Environmental Assessment	27
4.1 Introduction	27
4.1.1 Environmental sustainability in waste management	27
4.1.2 Targets of Waste Management according to the European waste policy	28
4.1.3 Sources of criteria for environmental sustainability assessment of municipal waste management.....	29
4.2 Environmental sustainability criteria and indicators	30
4.2.1 Selection of criteria based on Life Cycle Impact Assessment (LCIA) method	30
4.2.2 Criteria based on specific targets of European waste policy	31

4.3	Quantification of environmental indicators.....	35
4.4	Normalisation and aggregation of the environmental indicators	42
5	Economic Assessment.....	45
5.1	Introduction	45
5.2	Economic sustainability criteria and indicators.....	47
5.2.1	The criteria selection process.....	47
5.2.2	Selected criteria and indicators	48
5.3	Quantification of economic indicators	50
6	Social Assessment	57
6.1	Introduction	57
6.2	Quantification of social sustainability indicators	58
6.2.1	Temporary Storage.....	58
6.2.2	Collection and Transport.....	66
6.2.3	Waste Treatment	72
6.3	Aggregation of social indicators	81
6.3.1	Indicator calculation methodology.....	81
6.3.2	Indicator weighting.....	82
7	Temporary Storage	83
7.1	Process description.....	85
8	Collection and Transport.....	87
8.1	Process description.....	88
9	Treatment.....	91
9.1	Introduction	91
9.2	Chemical properties of waste	91
9.2.1	Separately collected organic waste	91
9.2.2	Mixed and residual waste.....	92
9.3	Composting of organic waste.....	94
9.3.1	Process description.....	95
9.4	Digestion of organic waste.....	96
9.4.1	Process description.....	96
9.5	Aerobic Mechanical-Biological Pre-Treatment	98
9.5.1	Process description.....	98
9.6	Anaerobic Mechanical-Biological Pre-Treatment.....	99
9.6.1	Process description.....	100
9.7	Incineration	101
9.7.1	Process description.....	101

9.8	Landfilling.....	102
9.8.1	Process description.....	102
9.9	Waste Recycling.....	104
9.9.1	Paper and cardboard Recycling.....	104
9.9.2	Glass Recycling.....	105
9.9.3	Metals Recycling.....	106
9.9.4	Plastic and composites Recycling.....	106
9.9.5	Packaging Recycling - Mixed dry recyclables.....	108
9.9.6	Waste electrical and electronic equipment.....	108
9.10	Production of energy and auxiliary materials.....	110
9.10.1	Electricity.....	110
9.10.2	Heat.....	110
9.10.3	Auxiliary materials.....	111
10	Case Studies	113
10.1	Optimal waste management scenarios for the selected cities from fast growing European regions –introduction.....	113
10.2	Selected cities with rapid growing economies.....	114
10.2.1	Xanthi-Greece.....	114
10.2.2	Kaunas-Lithuania.....	127
10.2.3	Wroclaw-Poland.....	142
10.2.4	Nitra-Slovakia.....	153
10.2.5	Reus-Spain.....	164
10.3	Summary of results of case studies.....	175
11	Good Practice in Planning of Waste Management Systems	181
11.1	Introduction.....	181
11.2	Management capability.....	181
11.3	Public awareness.....	185
11.4	Scavengers.....	188
11.5	Other aspects (demands on Temporary Storage).....	190
12	Waste Prognostic Tool guide	193
12.1	Introduction.....	193
12.2	Installation.....	194
12.2.1	System requirements.....	194
12.2.2	Downloading the tool.....	194
12.2.3	Downloading Java Runtime Environment (JRE).....	195
12.3	Using the LCA-IWM Waste Prognostic Tool.....	197
12.3.1	Program start.....	197
12.3.2	Input of the user's data.....	199

12.3.3	Obtaining the results.....	208
13	MSWMS Assessment Tool guide.....	213
13.1	Introduction	213
13.1.1	What is the LCA-IWM Assessment Tool?.....	213
13.2	Getting Started.....	214
13.2.1	Installing LCA-IWM.....	214
13.2.2	Tool skills.....	216
13.2.3	Computer Requirements.....	217
13.3	Using the LCA-IWM Assessment Tool	218
13.3.1	Opening the LCA-IWM Assessment Tool.....	218
13.3.2	A scenario.....	218
13.3.3	Flow chart tool	220
13.3.4	Default value	222
13.3.5	Help variable messages	222
13.3.6	LCA-IWM Main Menus, Contextual Menus and toolbars.....	224
13.4	Assessment session.....	252
13.5	Assessment session results	254
13.5.1	Environmental assessment session.....	254
13.5.2	Economic assessment session	262
13.5.3	Social assessment session.....	266
13.5.4	Condensed results.....	271
13.6	Remarks.....	273
	References.....	275
